All Production Running

Previous Week

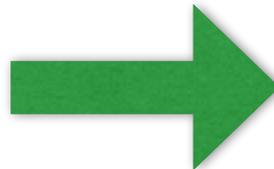

Hydrogen Target

- ▶ Sunday Morning - Pressure spiked and **H2 gas vented**
 - LH2 target left not completely full, so LH2 was removed from target rotation
 - Data continued to be recorded on other targets

Hydrogen Target

- ▶ Sunday Morning - Pressure spiked and **H2 gas vented**
 - LH2 target left not completely full, so LH2 was removed from target rotation
 - Data continued to be recorded on other targets
- ▶ Sunday Afternoon - Attempt to fill-up LH2 failed due to **obstruction in supply line**
 - Air got into line and froze
- ▶ Monday-Tuesday - **Warmed up LH2 target** to melt and eliminate blockage
- ▶ Wednesday - Hunted for and found leak: a **faulty needle valve**
- ▶ Thursday - Successfully **replaced the faulty valve**. Begin fill-up and cool down of LH2
