

# E906/SeaQuest Report

Michelle M. Medeiros  
for the SeaQuest Collaboration

Nov. 14, 2016.

# Computing usage.

- Low CPU efficiency → could be related to the time used to connect with the database.

Finishing the upgrade of the DAQ with reduced TDC dead time.

- Updated all ROCs with the new DAQ.
- Took data to test new DAQ.
- Finishing the online decoder.
- Finishing debugging some few issues.

# Summary.

- Chambers and hodoscopes are good to go.
- Solid targets good to go. Waiting for replacing parts for the liquid targets.
- Finishing the new DAQ.

Will soon be able to resume regular data taking.
